45	LA	CWA 311	Windham Oil Corporation	10/28/99	CACO	\$400	

1. AO = Administrative Order closed after compliance with the requirements of the order; APO = Administrative Penalty Order requiring compliance with environmental regulations and assessing a penalty; CACO = Consent Agreement and Order requiring compliance with environmental regulations and/or assessing a penalty; CJ = Civil Judicial Case with the Department of Justice
2. All penalties are Final
3. SEP = Supplemental Environmental Project

#### **Narrative Summary:**

**Gulf Island Fabrication Inc., Houma, LA:** Gulf Island Fabrication was inspected on April 20, 1999, for compliance with the Emergency Planning and Community Right-to-Know Act (EPCRA), Section 313 (toxic chemical emissions reporting to EPA and the State of Louisiana). The results of the inspection indicated that Gulf Island Fabrication had never reported their toxic chemical emissions pursuant to EPCRA 313 and a Complaint was issued on September 10, 1999, for penalties totaling \$214,200. Gulf Island Fabrication failed to submit Form R's for Manganese, Toluene, and Zinc for reporting years 1994, 1995, 1996, and 1997. The case was settled on December 23, 1999, with Gulf Island Fabrication signing a Consent Agreement and Consent Order (CACO) and agreeing to pay a penalty in the amount of \$182,000.00.

**ICO WORLDWIDE, AMELIA, LA:** A consent agreement and consent order was filed against ICO Worldwide, Amelia on November 10, 1999. A compliance evaluation inspection was performed at the facility on October 25-26, 1998. A request for information was issued to the facility on March 30, 1999. Violations of the Resource Conservation Recovery Act were noted during this inspection with the information request providing additional clarification of the violations. The facility failed to meet the exemption requirements for less than 90 day storage of hazardous waste without a permit. Numerous drums of hazardous waste were being stored in a manner that presented potential harm to the environment and human health. As part of the facility's compliance efforts, they have reduced the amount of hazardous waste the facility generates by eliminating one waste stream.
